• December 2018

Louis Pasteur's vision

« A science without border »

Institut Pasteur International Network

The Institut Pasteur International Network

A scientific and humanistic community united in its values and missions to serve public health worldwide.

32

MEMBER INSTITUTES

25

COUNTRIES

23 000

EMPLOYEES

Mid and long term capacity building

March 2014: West African Ebola virus epidemic

November 2014: Laboratory in Macenta.

November 2015: Signature of the Memorandum of Understanding for the future Institut Pasteur of Guinea.

2018: Construction of the Institut Pasteur in Guinea

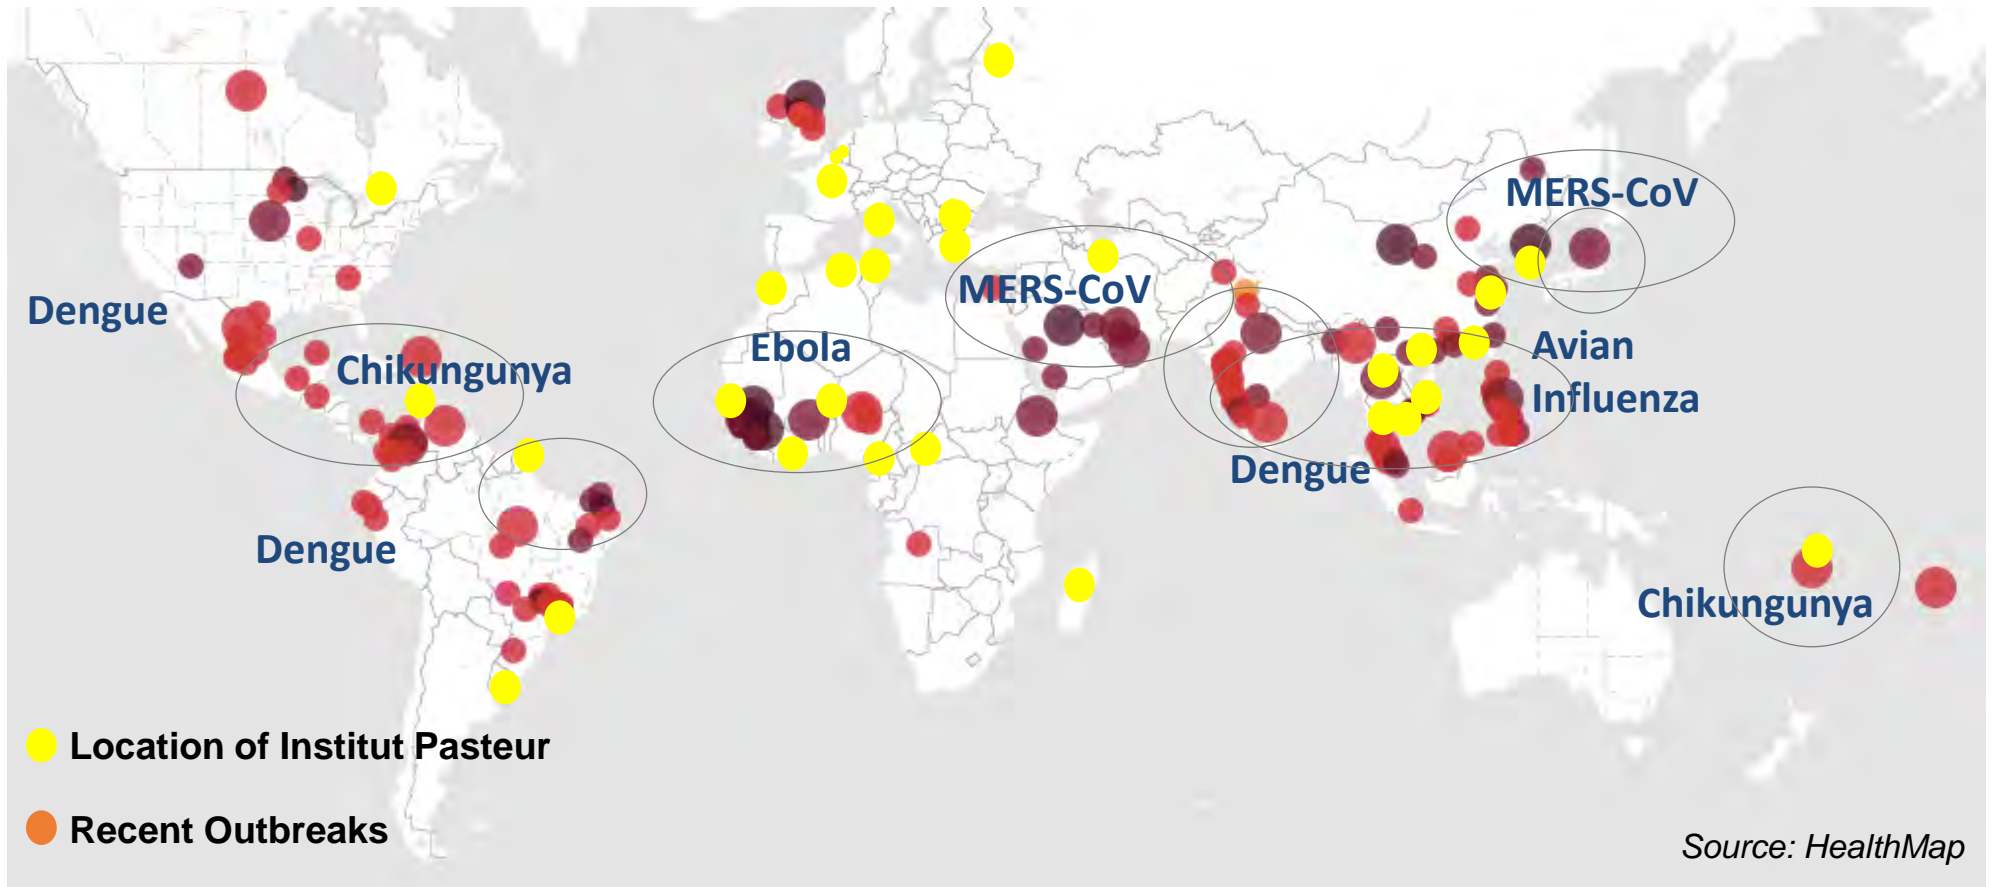

December 2017: Adoption of the law on the creation and operation of the Pasteur Institute of Guinea

November 2016: Laying of the foundation stone of the Institut Pasteur of Guinea.

Pasteur's capacity to respond to global threats

Solid foundation in the field • Established relationships with local governments •
Recognized partner for outbreak response

Health of the population

- Network of national references laboratories , WHO CC
- **2006** Co agreement with US DHHS/ ASPR
- **2006** Institutes joined the International Association of National Public Health Institutes (IANPHI)
- **2012** Agreement between Institut Pasteur and WHO, International Health Regulation
- **2016** Pasteur International Network Association recognized as an NGO in "Official Relations" with WHO

National Reference Laboratories

48 WHO NRC

19 WHO CC

Objective: to strengthen surveillance, detection and response capabilities in close partnerships with MoH

Pasteur Network' scientific strategy

Identification of strategic axes

4 strategic axes:

- **One health ecosystemic approach**
- **Vectors and vector borne diseases**
- **Maternal and child health**
- **Health impact of aging/ longevity and of non communicable diseases**

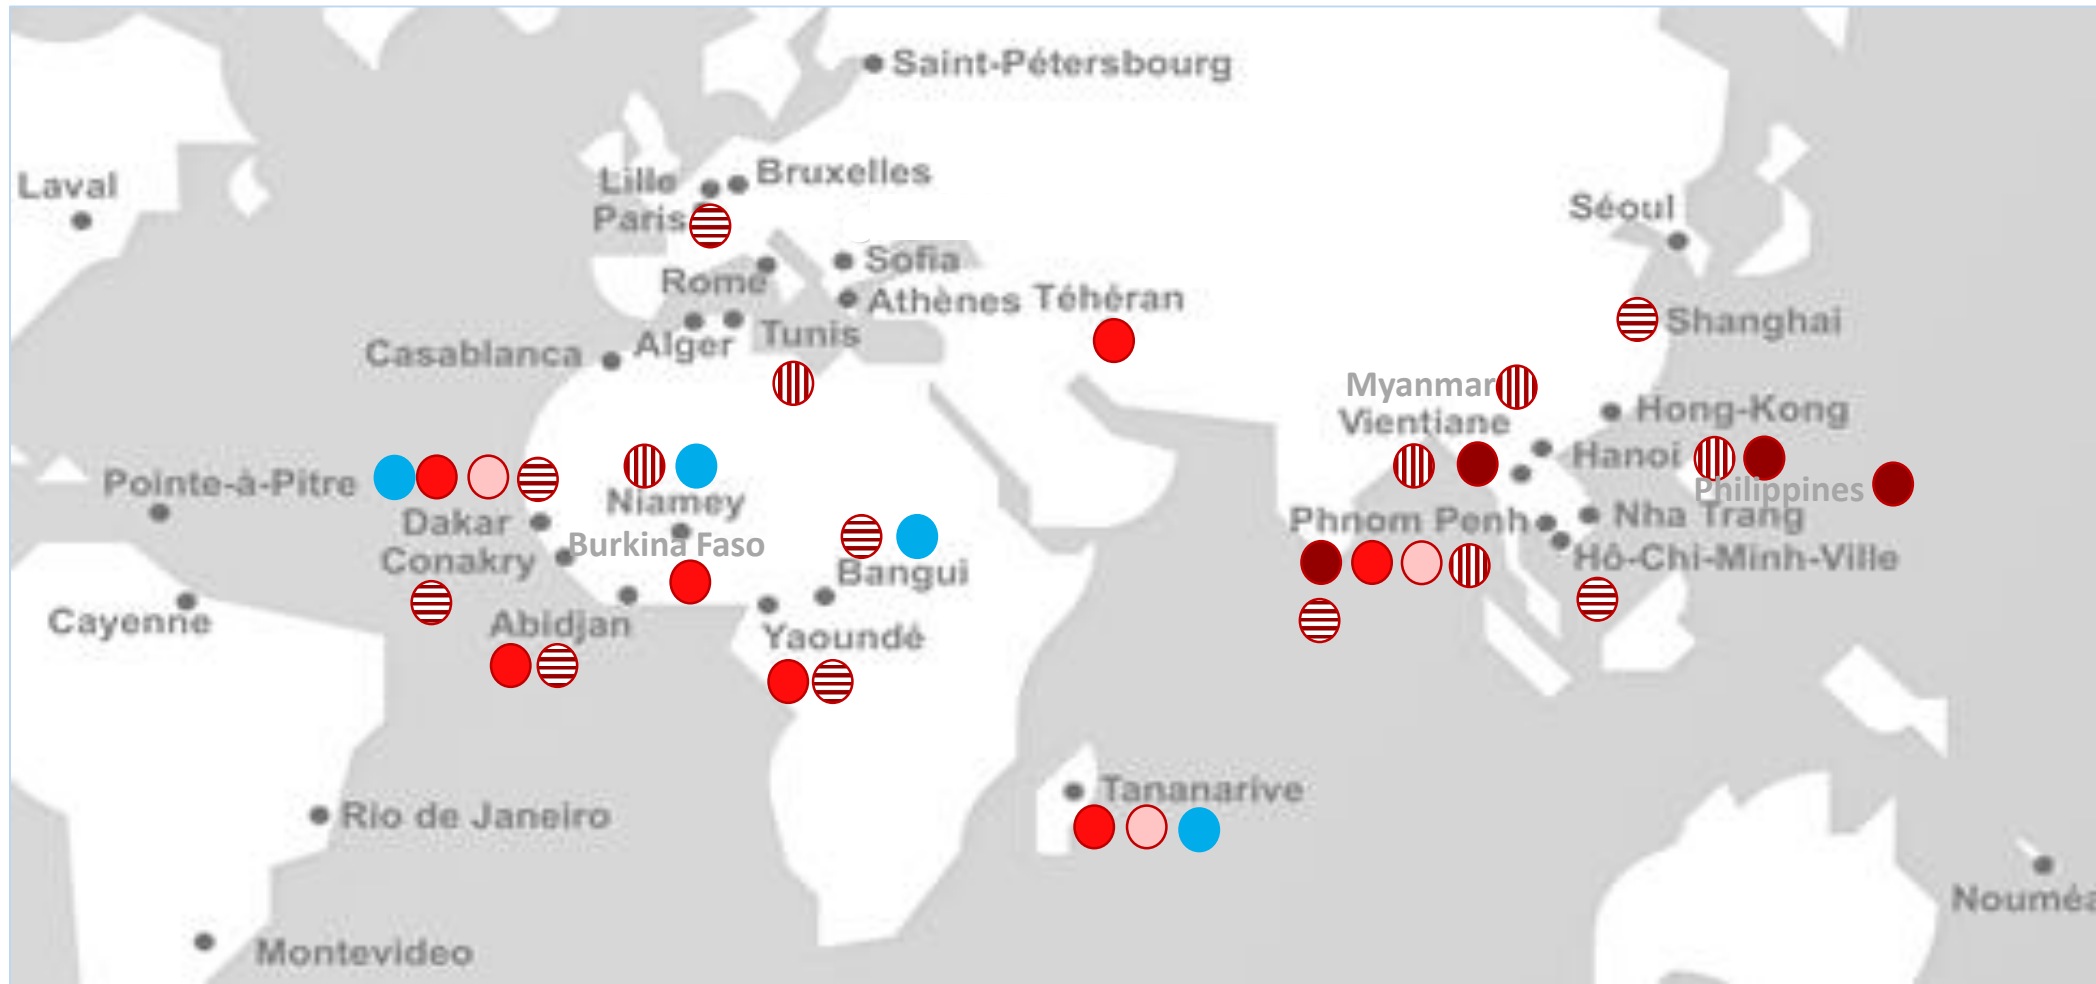

Some specific priorities :

Rabies, Leptospirosis, Malaria, Leishmaniasis, Antimicrobial resistance, Dengue, Hepatitis

Institut Pasteur international Network : diversity

International Research programs

INFECTIOUS DISEASES

- HEALTH & ENVIRONMENT
- VACCINE PREVENTIVE DISEASES
- AMR

- EPIDEMIC SURVEILLANCE
- ACCESS TO DIAGNOSE

NON INFECTIOUS DISEASES

- MALNUTRITION

Anti-Microbial Resistance Surveillance Network

- Institutes in low & middle-income countries with a bacteriology laboratory
N=10 (3 N. Africa, 4 W.Africa, 1 Madagascar, 1 Iran, 2 SE.Asia)
- Institutes in Europe and Americas
N=6 (2 America, 4 Europe)

Thank you
